EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The abstract has been amended as follows: "A reproducing arrangement for reproducing scenes of a stored film in an overview reproducing mode of the reproducing arrangement, has random access memory means for the storage of audio/video data (AVD) of a film which is reproducible at a normal reproducing speed during a film reproduction time (TW1, TW2), and mode means which enable the overview reproducing mode of the reproducing arrangement to be activated, at least two scenes of the stored film being reproduced in succession at the normal or an increased reproducing speed by the reproducing arrangement in the overview reproducing mode, and a skip scene recorded between two scenes and reproducible at the normal reproducing speed during a skip reproduction time interval not being reproduced in the overview reproducing mode."

Reasons for allowance

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a reproducing arrangement for reproducing scenes of a stored film. Independent claims 1, 9, and 14 identifies the uniquely distinct features "mode

means which enable the overview reproducing mode of the reproducing arrangement to be activated, at least two scenes of the stored film being reproduced in succession at the normal or an increased reproducing speed by the reproducing arrangement in the overview reproducing mode, and a skip scene recorded between two scenes and reproducible at the normal reproducing speed during a skip reproduction time interval not being reproduced in the overview reproducing mode; scene defining means for autonomously defining the scenes of a stored film which are to be reproduced by the reproducing means in the overview reproducing mode, the sum of the scene reproduction times defined for a stored film by the scene defining means essentially corresponding to always the same film overview reproduction time interval also in the case of different film reproduction times of the stored films.” The closest prior arts, Asai (EP 0, 915,469 A2) and McCollum (EP 0 724 211 A2) fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
